INTRODUCTION

R&S Tech solutions is a electrical design consultant and contracting in electrical and mechanical systems (MEP). It began its journey in 2014. They serve every sector of the industry like automobile, rubber, pump, furniture, Aluminum and pharmaceuticals etc.,

Within a short span, they proven its effective management in electrical distribution systems - more safety, more efficient and more reliable.

They gathered every detail of last stint which includes works and customer feedbacks, rising challenges, new technologies and invested those knowledge in further projects to create their own path.

A well designed electrical system, coupled with quality products, good installation and meticulous maintenance can avoid mishaps. This is our main aim.

**To be successful, you have to have heart in your business
And your business in your heart**

VISION AND MISSION

OUR VISION

We aspire to be recognized as the contractor of choice for large, complex and demanding projects. A company that our clients want work with, our customers can rely on and our employees are proud to work for.

OUR MISSION

We Strive for longtime relationship with our clients and business partners by honoring our commitments no matter what and providing our end users with superior quality management and multi technical services that meet or exceed their expectations.

**Our vision, which has not changed
Since the day the company was founded**

QUALITY POLICY

- ◆ We are committed to achieve customer satisfaction by continuously improving our products and services through implementation of process and procedures guided by principles of quality managements.
- ◆ Our suppliers are integral to the quality process and company employees shall work closely with them to meet the standard required to achieve engineering excellence and fully satisfy our customer's needs.
- ◆ We provide all required supporting services through continuous upkeep of project site and its equipment by adopting latest technology.
- ◆ Continually improve the service, quality, occupational health, safety and environment performance in our activities.
- ◆ Eliminate and prevent from occurring all defects and clients complaints throughout the organization.

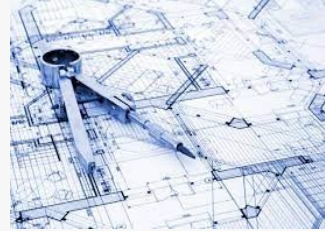

**Quality means doing it right when
No one is looking**
